

# USAGE INSTRUCTIONS

Item #CC1117-B

## INSTALLATION METHOD #1

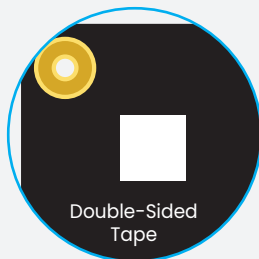

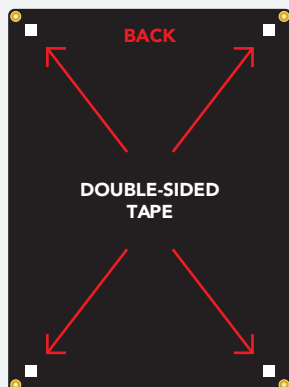

### GROMMET HOLES

Using the four grommet holes, hang by fasteners to the wall. (Fasteners not included)

Please have an experienced maintenance engineer or contractor hang the board. This will minimize potential losses as a result of accidentally drilling into an electrical, gas or other utility line.

## INSTALLATION METHOD #2

### DOUBLE-SIDED TAPE

Use double-sided tape included with the Display Board and mount to a clean, dry wall.

**NOTE:** Using the double-sided tape makes the Display Board installation permanent. You may find it difficult to remove the board, and wall damage may occur.

## TIPS

### MAINTENANCE

- Use a clean, dry, soft cloth.
- To clean grease or dirt buildup, use a small amount of hand soap and water on a clean, soft cloth.
- Do not use abrasive cleaners.

### INSERTING INTO SLEEVES

- Leave the previous poster or notice in the sleeve when inserting the new one. Once in place, you may remove the old poster or notice.
