DESCRIPTION

The food service industry requires the use of hot liquids in their preparation and cooking processes. Each year, thousands of injuries are caused by employees transporting scalding hot water from the hot water dispensers to food preparation areas.

- The hot water dispensers most commonly used in the food service industry are dispensing water at temperatures up to 212°F
- Employees can suffer third-degree burns if exposed to 149°F water for 2 or more seconds, or if exposed to 140°F water for 5 or more seconds.

Goal: Reduce the incidence rates and losses associated with hot liquid scald injuries
